ABSTRACT

This bibliography lists all entries from the Jean Piaget Archives Catalogues dealing with mental retardation. The list, including almost 200 entries, encompasses four works by Piaget himself, one collaboration, and 189 works by other authors. Entries are arranged in order by their publication in one of the 12 catalogues of the archives, providing a roughly chronological approach. The list includes primarily items in English, with some in French, German, Italian, and Spanish. Each entry is identified by a key word to aid searches for specific subjects. Key words include, among others: assessment, cognitive development, concept identification, concept of number, concept of space, conservation, education, imitation, memory, moral judgment, parents, pathology, perception, play, problem-solving, reasoning, sensorimotor development, stimulation, and symbolic play. Since his early publications in the 1920's, Piaget has had waves of major impact on psychology and related sciences. At this time, Piaget's work, that of his collaborators, and that inspired by them is very extensive. In order to provide a single location and focus for this work, the Jean Piaget Archives was established at the University of Geneva as a documentation and research centre.

Piaget's work has also had major impacts on the field of mental retardation. In order to make work done by Piaget and work done from a Piagetian perspective accessible to researchers, special educators, and others, we searched all entries of the Jean Piaget Archives Catalogues (Catalogue I to XII) for work on, or related to, mental retardation. The following bibliography is the result of this undertaking.

This report contains a bibliography of nearly 200 entries of primary and secondary source literature of Jean Piaget dealing with mental retardation. Primary literature (written solely by Jean Piaget), collaborations (written in collaboration with Jean Piaget) and secondary literature (written by various authors dealing with Piagetian subject matter) are presented in bibliographical format. While there are only 5 entries of primary literature, there are 189 entries on secondary literature. Piaget's work obviously inspired others to examine mental retardation from his perspective. All entries are identified according to key words to aid searches for specific subjects. The key words are similar to those used by the Jean Piaget Archives Catalogue. The Catalogues may be purchased from Fondation Archives Jean Piaget, Universite de Geneve, 6 rue de Saussure, 1211 Geneve 4, Suisse.
